Syed Jamil Uddin

Senior .NET Fullstack Developer

Hyderabad, Sindh, Pakistan | +92 345 3419534 | syedjamil12@gmail.com | linkedin.com/in/syedjamil12

Professional Summary

Senior Fullstack .NET Developer with 9 years of experience designing and developing robust software systems. Skilled in system assessment, crafting solutions aligned with architectural requirements, and overseeing technical specifications for .NET applications, from ASP.NET Web Forms and MVC to modern .NET Core microservices with Angular front ends, cloud deployment, and AI-assisted engineering workflows.

Technical Skills

Languages & Frameworks: C#, .NET Core, .NET Framework, ASP.NET Core, ASP.NET MVC, ASP.NET Web Forms, Web API, RESTful Web Services, Microservices Architecture, Windows Forms, WPF, WCF, Console and Windows Services

Front End: Angular, TypeScript, JavaScript (ES6+), RxJS, HTML5, CSS3, Bootstrap, jQuery

Database: MS SQL Server, MySQL, T-SQL, Stored Procedures, Functions, Views, Triggers, SQL Jobs, Database Design, Query Optimization, MongoDB, Redis

Data Access: ADO.NET, Entity Framework, LINQ, LINQ to SQL

Cloud & DevOps: Microsoft Azure, AWS, cloud-native deployment patterns, Docker (image creation, Dockerfiles, Windows- and Linux-based containers), Kubernetes (service orchestration, scaling, deployment management), IIS 7/8/10 (deployment, configuration, performance tuning), Azure DevOps (CI/CD pipelines, repos, task management)

Messaging & Distributed Systems: RabbitMQ, Azure Service Bus, Kafka

Reporting: SAP Crystal Reports, RDLC Reporting, DevExpress XtraReports, Data Visualization

API Integrations: Authorize.Net, PayPal (Braintree), Twilio SMS API, ShipStation API, eBay API, Shopify API, AWS API, QuickBooks Integration

AI-Assisted Development: GitHub Copilot, Claude, ChatGPT for development acceleration, code review, refactoring, and unit test generation across legacy and modern .NET codebases; contributes to team standards for responsible AI use, prompt engineering, and AI-assisted PR review workflows

Tools & Practices: Git (branching strategies, PR workflows, code review), SVN, TFS, Agile/Scrum, MVVM, Repository Pattern, Web Scraping, EDI, JSON/XML, Visual Studio, VS Code

Professional Experience

VeriPark Software Solutions Pvt Ltd, Remote | **September 2022 - Present**

Senior .NET Fullstack Developer

- Design and develop VeriBranch, a branch automation platform for banking operations including account and loan management, using C#, .NET Core, Microservices, Angular 16, TypeScript, Redis, SQL Server, and Azure App Services.
- Perform system assessment and craft solutions aligned with architectural requirements for enterprise clients.
- Own technical specifications and support integration between digital and conventional branch systems.
- Use AI coding assistants (GitHub Copilot, Claude) to accelerate development, code review, refactoring, and unit test generation, and contribute to team standards around responsible AI use and prompt engineering.

AppsXone Technology, Hyderabad, Sindh, Pakistan | **July 2017 - September 2022**

.NET Developer

- Developed and maintained multiple ASP.NET Web Forms applications using C# and SQL Server for US and international clients across e-commerce, healthcare, and services industries.
- Led a small team building the Elite Brand camera and lens sales system, including an automated shipping and label generation mechanism and inventory management features.
- Developed the Verified refurbished electronics platform (web portal and mobile app) integrating Amazon, Shopify, and eBay for inventory, sales, and customer order management; wrote the APIs used by the mobile app and managed deployments.
- Built WCF APIs for the Quality Cooling order management system serving airport-based DIY and food service operations.
- Developed the Creative Pets customer portal from scratch for a USA-based pet food and accessories company, integrating multiple marketplaces for order management, plus ongoing support and maintenance.

- Built a web scraping and data synchronization application for a dental equipment platform, pulling product data from Net32 into SQL Server and pushing catalog updates back via scraping.

QTechnology Solutions, Hyderabad, Sindh, Pakistan | **April 2016 - March 2017**
.NET Developer

- Developed a Tutor System web portal from scratch using MVC ASP.NET, jQuery, C#, and SQL Server, enabling teachers to offer lessons and students to browse and book available time slots.
- Developed a Car App e-commerce platform from scratch using MVC ASP.NET, jQuery, C#, and SQL Server, supporting vehicle listings, bidding, and direct purchases.

Softnology System Pvt Ltd, Karachi, Sindh, Pakistan | **May 2015 - March 2016**
Junior .NET Developer

- Contributed to HealthCheck101, a multi-user doctor-patient portal built with ASP.NET Web Forms, jQuery, C#, and SQL Server, focusing on bug fixes and performance improvements.
- Contributed to an HR Management System (web, desktop, and mobile) built with MVC ASP.NET, jQuery, C#, and SQL Server, developing multiple screens and UI for employee records, attendance, payroll, and performance tracking.

ShinerSoft Pvt Ltd, Karachi, Sindh, Pakistan | **January 2015 - April 2015**
Junior .NET Developer

- Contributed to an Auto Shop Management System built with MVC ASP.NET, jQuery, C#, and SQL Server, working alongside a team lead on screens, UI, and bug fixes for vehicle maintenance, inventory, and staff management.

Projects

Police Constable Record Application

- Co-developed a web application, from scratch, to manage police constable records, including buckle assignment, punishments, leaves, service book records, and reporting.
- Built with ASP.NET Web Forms, jQuery, C#, and SQL Server.

FK Industry Accounts Application

- Co-developed a comprehensive accounting system, from scratch, for an iron and steel merchant, covering sales, purchases, inventory, item tracking, payments, ledgers, receivables, payables, and financial reporting.
- Built with MVC ASP.NET, jQuery, C#, and SQL Server.

GorillaUTIL (gorillautil.com) | ASP.NET MVC

- Built and maintain a free online utility platform, including PDF tools, handling UI, SEO, and deployment end to end.

EssentialTechGB (essentialtechgb.co.uk) | E-commerce

- Designed and developed the e-commerce website for a UK-based refurbished IT equipment retailer, covering the product catalog for laptops, desktops, all-in-ones, and accessories.

ByteGorilla (bytegorilla.com) | HTML, CSS, IIS, Windows VPS

- Designed, built, and deployed the agency website on a self-managed Windows VPS, configuring DNS, IIS site bindings, SSL (win-acme), and HTTPS redirects via URL Rewrite.

Education

- Masters in Computer Science (MCS) - University of Sindh, Jamshoro
- Bachelor of Computer Science and Information Technology (BCIT) - University of Sindh, Jamshoro
- Advanced Diploma in Information Technology - S.B.T.E Karachi
